

We are Cloud Insurance

We saw the insurance industry struggling to innovate and companies held back by legacy systems, bad data and a long time to market. Our cloud-based software offers a solution that help insurers reach their business potential.

THE MISSION

Is to provide infrastructure that gives you more time to develop and distribute the insurance products of tomorrow. In short, we do the heavy lifting so you can focus on what you do best: Innovation, distribution and product development.

THE SOLUTION

We offer our Software as a Service to clients in the insurance industry. Cloud Insurance is a modern core insurance system with extensive policy and claims management capabilities. We have an end-to-end approach and support your customer journey from start to finish.

THE PEOPLE

The Cloud-team consists of young techies, ex-consultants and heavy hitters from the finance and insurance industry. We have an international mindset through previous experience in global companies in the tech, finance, insurance and consulting sector.

We have clients working in our system across over 20 countries in five continents. Our client base includes insurance companies, agents, brokers and MGAs - a testimonial to Cloud Insurance flexibility.

“

We have increased client satisfaction, improved the efficiency of our entire administrative operations, and are able to manage onboarding new clients and renewals at a much higher rate.

JOHN FLEMING
Director, Compass Benefits Group

“

The flexibility to automate and streamline processes that differ between products is remarkable, and fits right into our strategy of offering the best user experience possible.

PATRICK LJUNG
Head of IT, Insr ASA

There are many ways to get started with Cloud Insurance. We love starting off with a mini-pilot with focus on testing new ideas fast. Get in touch to hear more about how this could benefit you!
